1. A new airfield is under construction at Tylewice (Tillendorf - 052/B89)-Lysiny (Lissen), Wachowa district, bordered by the towns on the south, and by the woods and the village of Nowa Wies (Neuguth) on the north.
2. The woods have already been cleared in the northern part of the airfield and construction should be completed by the fall of 1954.
3. Workers are recruited from the neighborhood and tractors furnished by the Machine Tractor Station (Panstwowy Osrodek Maszynowy- P.O.M.) at Tylewice. A military detachment located at Nowa Wies is in charge of the construction.
4. Source believes that the field may be used only for gliders because glider training was being conducted at the nearest Polish garrison in Leszno in August 1953. The soil in Leszno is fertile and adapted for farming while the soil at Wachowa is more sandy. Also, there is no area large enough for an airfield at Leszno. there was no material for the construction of hangars or concrete buildings on the airfield.
